Increase the longevity of your pump and reduce your total cost of ownership!

Stainless Pumps

- Pump interchangeability amongst 2196 ANSI, 2196R, 2196LF ANSI and 2796; or Group 1 & 2 Clark 3 ANSI, Clark 3R and Clark 3 Self Primer.
- Advanced thermal fatigue resistance when environment is subject to high and low temperature extremes.
- 2196 Forever Frame's™ product life cycle is extended in most applications. Making it more economical in permanent applications versus the standard cast iron frame.
- Stainless steel drive and wet end components plus fasteners, plugs, sight glass and frame's foot.

Stainless Powerends and Shaft Kits

- Interchangeable with your existing 2196 ANSI, 2196LF ANSI, 2196R and 2796; or Group 1 & 2 Clark 3 ANSI, Clark 3R and Clark 3 Self Primer powerends.
- High quality SKF® bearings.
- Thermal expansion rates are similar to the bearings which allows for reduced stress during startup and shutdown.
- Higher heat capacity gives the Forever Frame™ excellent use in high temperature applications and environments.

Applications

- Corrosive Services
- Acid & Caustics
- Pharmaceutical
- Polymers
- Solvents
- Food & Beverage
- Hot Oils
- Chemical/Petrochemical Processing
- Pulp & Paper
